Election/Restrictions

1. This application contains two distinct inventions outlined as follows. Restriction to one of the inventions is required under 35 U.S.C. 121:

Group I: claims 1-27 and 36-45 are directed to a method of extending promotional discounts on items for sale to one or more uniquely identified consumers.

Group II: claims 28-35 are directed to a system for providing prices for a plurality of items to a plurality of selected consumers.

2. The two groups of inventions are distinct, each from the other because of the following reasons:

The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)).

In this case the process as claimed in Group I can be practiced by another materially different apparatus than one of Group II because such apparatus must perform process of Group I, in particular "withdrawing said discount or special price to said identified consumer", "granting said discount upon purchase

Art Unit: 3624

of said item ...prior to said withdrawing step" and "holding said withdrawing step in abeyance upon acknowledgement of said promoting step by said identified consumer". However, these features are not included in apparatus of Group II.

Alternatively, apparatus of group II can be used to provide prices for a plurality of items to consumers in general and special prices for a first set of selected items to a first set of selected consumers. This process is materially different process than one of Group I.

Because these inventions are distinct for the reasons given above and the search required for group I is not required for groups II restriction for examination purposes as indicated is proper.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
